

REUSABLE UP TO.....12 WEEKS

BOOM!

Sika Boom[®] Expanding Foam

BUILDING TRUST

■ REUSABLE FOR UP TO 12 WEEKS

Most Foams are not reusable. Some Foams are reusable for only 6 weeks. But with Sika Boom® you simply fold the delivery nozzle in half and insert the end of it into the handy little plug on the trigger. **BOOM!**

■ WORKS AT ANY ANGLE, EVEN UPSIDE DOWN

Unlike most Foams, you're not restricted by the can having to be upside down. So all those hard to reach places are no longer hard to reach. **BOOM!**

■ VERY HIGH YIELD

One 750 ml can will fill a space up to 50 times its size! And don't forget to pre-dampen the substrate with clean water – this ensures that the Foam expands and cures optimally. **BOOM!**

■ BRANZ APPRAISED

Sika Boom® can be used as an air seal – meets E2/AS1 (NZ). **BOOM!**

■ NO RISK OF ACCIDENTAL RELEASE IF DROPPED*

Drop most cans of Foam and if the very exposed application valve breaks, you might as well throw the can in the bin. But Sika Boom® has special **Gold Valve Technology** that's internal, so if the can is dropped, the valve cannot be snapped off, so there's no risk of accidental release. **BOOM!**

**Available with Sika Boom 500 ml and 750 ml*

■ NO BLOCKAGES EITHER

This same advanced **Gold Valve Technology** prevents air leaking into the can, and has no rubber parts which can tend to stick together, so blockages are eliminated too. This clever valve also gives Sika Boom® a 15 month shelf life. **BOOM!**

**Available with Sika Boom 500 ml and 750 ml*

THREE SIZES

250 ML 500 ML 750 ML
