MORRINSVILLE MUNICIPAL SWIMMING POOL UPGRADE

PROJECT DESCRIPTION

Morrinsville's outdoor Municipal Pool Complex is more than half a century old and was in need of upgrading. The scope of the project included building up the sides of the pool to increase the depth, constructing a new balance tank & sparge lines, new ramp, handrails and general refurbishment including piping, joints and coatings.

PROJECT REQUIREMENT

A reliable solution was required to seal over existing old joint sealants and new concrete joints. Approximately 900m of Sikadur Combiflex SG with 2mm tape was used to ensure long term hydrostatic pressure resistance and durability. Products from the Sikadur and Sika MonoTop ranges were used for general repair and patching work.

Overcoming the elements of winter and spring conditions, having poor substrate soaked by constantly flowing underground springs, accompanied with poor quality and contaminated concrete requiring replacement and upgrading are a few hurdles that were overcome and made this project rewarding once completed.

SIKA SOLUTION · SIKA PRODUCTS

- Sikadur Combiflex SG (2mm)
- Sikadur Epoxy Range
- Sika MonoTop Range

PROJECT PARTICIPANTS

Product Specifier:

Design Management Consultants Hamilton

Main Contractor:

Fletcher Construction Waikato, BOP

Specialist Contractor:

GMR Holmac Ltd Hamilton
