Sikafloor® SOLUTIONS FOR NEW AND REFURBISHMENT WORK

INTRODUCTION As one of the worldwide market leaders in construction products, Sika has a strong focus on flooring and coating systems and applications. Sika provides a full range of flooring and coating solutions to meet the latest standards and requirements in the construction industry.

Concrete and masonry are used throughout the Wine Industry in the form of walls, floors, bunds, vat storage areas, etc. Concrete is an alkaline material and over time, contact with any acidic substance will result in chemical damage. Sika can offer you solutions to repair, protect and minimise this damage, giving you a durable surface that will provide:

- High impact resistance
- Impermeability to liquids
- Good chemical resistance
- Non-skid / anti-slip finishes
- Tolerance of temperature changes
- Attractive colour options

UNIQUE EPOCEM TECHNOLOGY FOR 'GREEN' AND DAMP CONCRETE

Sika EpoCem is an intermediate temporary "moisture barrier" that can allow the floor finish to be applied despite the high substrate moisture content. This unique Sika EpoCem

technology allows application to a 'green' or damp concrete, reducing construction time and eliminating the risk of blistering. This results in time and money saving!

Sikagard-720 EpoCem · Sikafloor-81 EpoCem

- EpoCem = epoxy + cement
- Allows installation of flooring system on substrates with moisture content >4%
- Prevents osmosis
- Reduces construction programme

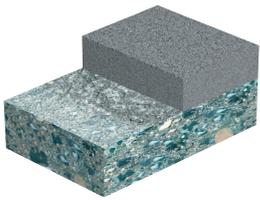

HIGH CHEMICAL RESISTANCE

Sikagard-62, a two-component high build thixotropic protective coating based on epoxy resins. When cured it provides a hard, glossy film with high resistance to abrasion and chemical attack.

SUITABLE FOR WALLS AND FLOORS.

HEAVY DUTY INDUSTRIAL FLOOR SCREED

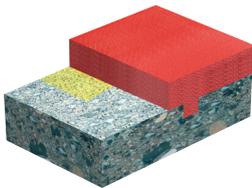

Sikafloor-91 / -156

A three component, epoxy screed for industrial floors subject to heavy traffic. Sikafloor 91 is a trowel finished screed applied in layers between 5 - 40mm thick.

- Solvent free - non tainting
- Excellent abrasion resistance
- High impact resistance
- Good chemical resistance

HEAVY DUTY INDUSTRIAL FLOOR SCREED

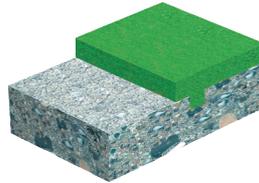

Sikafloor-20 N PurCem

A four component, resin rich, water dispersed, high strength, trowel grade, coloured polyurethane modified, cement and aggregate screed applied in layers between 6 - 9mm thick.

- Rapid, one step application - reduces downtime
- Non-tainting, low odour
- Can apply to 'green' concrete

HEAVY DUTY INDUSTRIAL FLOOR SCREED

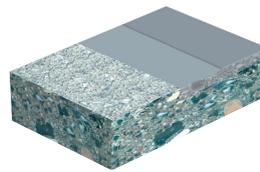

Sikafloor-21 PurCem FG

A three component, resin rich, water dispersed, high strength, trowel grade, coloured polyurethane cement screed applied in layers between 4.5 - 6 mm thick.

- Rapid cure - reduces downtime
- Non-tainting, low odour
- Can apply to 'green' concrete
- Smooth or slip resistant options

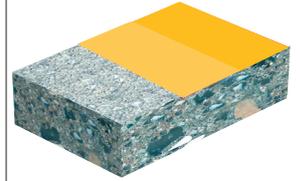

WATER BASED EPOXY ROLL ON COATING

Sikafloor-2530W / -2540 W

- Roll-on coating for light mechanical wear
- Does not require application by a specialist flooring applicator
- Available in a wide range of colours
- Also suitable for walls and floors

SOLVENT FREE EPOXY

Sikafloor-264 /-264 T

A two-component, solvent free, pigmented epoxy resin based flooring system.

- Versatile solvent-free flooring system
- Can be used as a:
 - Roll-on coating
 - Self-smoothing screed (smooth and anti-slip)
- Non-slip broadcast system
- Available in almost any standard RAL colour

Sikafloor-264 T

A two-component solvent-free coloured high-build epoxy coating. It can be applied to vertical surfaces (walls and coves) and can also be used to provide a textured floor coating.

FOR MORE FLOORING INFORMATION:

WHO WE ARE

Sika AG, Switzerland, is a globally active speciality chemicals company. Sika supplies the building and construction industry as well as manufacturing industries (automotive, bus, truck, rail, solar and wind power plants, façades). Sika is a leader in processing materials used in sealing, bonding, damping, reinforcing and protecting loadbearing structures. Sika's product lines feature high quality concrete admixtures, specialty mortars, sealants and adhesives, damping and reinforcing materials, structural strengthening systems, industrial flooring as well as roofing and waterproofing systems.

Our most current General Sales Conditions shall apply.
Please consult the Data Sheet prior to any use and processing.
