

SIKA AT WORK

BMW WORKSHOP FLOOR

FLOORING: Sikafloor-161 & Sikafloor-315

BUILDING TRUST

BMW WORKSHOP FLOOR, HAMILTON, NZ

PROJECT DESCRIPTION

In late 2016, Combes Johnston BMW moved from their Te Rapa premises to a new purpose built facility. The new site included an existing building that was converted into a new workshop, which required a premium floor befitting the BMW brand.

PROJECT REQUIREMENT

- A flooring system was needed that was thick enough to cover and conceal an old concrete floor and provide a highly durable, attractive and functional surface.
- Sikafloor-315 was used to provide a finely textured, UV stable, highly abrasion resistant seal-coat that is also easy to clean and maintain.

CHALLENGES

- Significant preparation of the old concrete surface was required to bring it up to an acceptable standard.
- Sikafloor-81 EpoCem was used where green concrete was encountered to enable the finished Sikafloor system to be laid without delays.

PROJECT SIZE

817M²

SIKA SOLUTION

Sikafloor-264 with a Sikafloor-315 Finish Coat

SIKA PRODUCTS

Primer

Sikafloor-161

Moisture Control Primer

Sikafloor-155 W

Sikafloor-81 EpoCem

Flooring Body Coat

Sikafloor-264

Flooring Finish Coat

Sikafloor-315

Joints

Sikaflex Sealant
