A BESPOKE SIKA SPECIFICATION IS A MUST. There is never one solution that fits all project designs, details or site conditions. Let Sika provide you with a bespoke specification proposal for your project, to ensure compatibility between product solutions, especially the critical connections between systems (from the below ground waterproofing to the roofing membrane, and anything in-between). Our basement to roof system is the only BRANZ appraised one in New Zealand - great solutions, not problems.

Phone 0800 745 269 to talk to a Sika specification expert or visit sika.co.nz.
