ROOFING

BUILDING TRUST

NAPIER HEALTH CENTRE, 76 WELLESLEY ROAD, NAPIER

PROJECT DESCRIPTION

Built in the 1990s, this project was intended to be a medical hub for Napier City residents. Several design aspects were incorporated to give it a modern look and feel. The curved plywood roof was a key component of the design but water ingress had been a long term problem.

PROJECT REQUIREMENT

A SikaRoof MTC solution was agreed upon after applications on other parts of the building had proved successful. Key advantages included SikaRoof MTC's fast cure, unique ability to conform to the unusual shape, ease of application and its proven durability.

CHALLENGES

Very deep roof gutters, steep curves, decorative battens over the sheet joints, and a 24 hour working medical facility below.

PROJECT SIZE

650 sqm

SIKA SOLUTION

SikaRoof MTC-22

PRODUCTS USED

Sika Bonding Primer
Sikalastic-601 BC
Sika Reemat Premium
Sikalastic-621 TC

PROJECT PARTICIPANTS

Product Specifier:	Koru VSL, Dougan Larkworthy Team Architecture
Main Contractor:	Alexander Construction
Specialist Contractor:	Gunac Hawkes Bay
Sika Contact:	Kelvin Birch
