PAKURANGA HOCKEY CLUB, LLOYD ELSMORE PARK, PAKURANGA

PROJECT DESCRIPTION

Lloyd Elsmore Park has been the home of Auckland Hockey since 1991, with a top-class facility suitable for hosting national and international tournaments. Today Auckland Hockey Association is the largest hockey organisation in New Zealand, with clubs and 400 teams across all ages competing throughout winter and summer. Following a number of years of wear and use, the walkways and bleachers were ready for refurbishment to keep the facility top-class.

PROJECT REQUIREMENT

A flooring system and joint sealing system was required for the balconies, walkway areas and bleachers. The Product had to be robust, UV and weather resistant, provide a non-slip finish for pedestrian traffic areas and could be coloured to suit the building aesthetic.

SIKA SOLUTION

Sikafloor-400 N Elastic is a one part, highly elastic, UV resistant, coloured, waterproof coating, used as a slip-resistant coating for balconies, terraces, footbridges and stairways exposed to weather and light to medium exposure. Its low maintenance properties make it the suitable solution for the Auckland Hockey Club.

PRODUCTS USED

Sikafloor®-400 N Elastic
Sikaflex® AT-Facade

PROJECT SIZE

300 m²

PROJECT PARTICIPANTS

Main/ Specialist Contractor: Conslab Ltd
