PROJECT DESCRIPTION

Flooring system for a craft beer manufacturing facility and chiller room

PROJECT REQUIREMENT

The client required a robust, non-slip, hygienic, food grade, seamless, easy clean, flooring system. As the manufacturing facility can be viewed by the public, it was essential that the flooring system also be decorative as well as highly functional.

CHALLENGES

Coving was required up the block walls to a height of 100cm to ensure a seamless, easy clean surface. Little Creatures is a popular "open plan" craft brewery and restaurant so the brewing area floor is visible to the public. The aesthetics of the finished floor were therefore an important consideration too.

SIKA SOLUTION

The addition of Sika Extender T allowed the product to be applied vertically up the walls to the required 100cm to create seamless coving.

Red is also the colour of the Little Creatures logo. Sika PurCem was supplied in a Red Oxide colour which while mirroring the operation's logo also gave an attractive contrast to the stainless steel and aluminum of the brewing machinery.

PROJECT SIZE

156m² of flooring
57 l/m of coving

PRODUCTS USED

Sikafloor-21 PurCem
Sikafloor-29 PurCem
Sikafloor-31 PurCem
Extender T
Sikasil Pool

PROJECT PARTICIPANTS

Specialist Contractor:	Absolute Resurfacing Ltd
Main Contractor:	LT McGuinness Ltd
Sika Contact:	Melissa Stuckey
