Image: www.foodstuffs.co.nz

Project description

Refurbishment of the existing floor at Pak'nSave Invercargill was required, which had deteriorated after many years of continuous heavy use. The project focused on upgrading the flooring system to restore performance, durability, and appearance within a high-traffic supermarket environment.

Project requirements

The client required a robust flooring solution capable of withstanding constant foot traffic and trolley movement. The system needed to provide high mechanical and chemical resistance, be easy to clean and maintain, offer slip resistance for safety, and retain a long-term decorative finish suitable for a retail environment.

Project facts

Project name	Foodstuffs South Island Limited, Pak'nSave, Invercargill
Location	95 Tay Street, Invercargill, New Zealand
Year	2026
Project Size	300 m²
Product	Sikafloor®-264 Plus Sika Aggregate®-508 Sikafloor®- 150

Sika solutions

Sikafloor MultiDur EB-12 was selected as a durable, high-performance flooring system suited to heavy-use environments. This epoxy system provides a seamless, hard-wearing surface with excellent mechanical and chemical resistance. The multi-layer build-up, incorporating aggregate, delivers a slip-resistant, easy-to-maintain finish ideal for busy commercial spaces.

Challenges

- As the works were carried out within a fully operational supermarket, careful planning was required to minimise disruption. Installation was completed in staged sections during night shifts to align with store operations, ensuring business continuity while maintaining strict project timelines.

Project participants

Main contractor	Foodstuffs South Island
Applicator/ Contractor	Fi Innovations
