WATERWORLD, HAMILTON

PROJECT DESCRIPTION

Replace existing screed covering the pool concourse area.

PROJECT REQUIREMENT

- Decorative screed to provide a non-slip, hard wearing, stain resistant, easy care surface suitable for a busy public hydrotherapy pool environment
- The Sikafloor system installed produced a low odour while curing, therefore minimising disruption to the staff and the public
- The impervious finish is hygienic and practical for all pool environments
- A non-yellowing epoxy top coat was used to prevent UV light discoloration and keep the surface looking great long-term

CHALLENGES

The old screed had to be fully removed and the new floor screed had to be installed on time with minimal disruption to the fully operational adjacent pool and changing facilities.

PRODUCTS USED

Sikafloor-264
Sika Coloured Aggregate
Sikafloor-169

PROJECT SIZE

420 m²

PROJECT PARTICIPANTS

Product Specifier: Hamilton City Council
Specialist Contractor: NZ Specialised Coatings Ltd
