# Sika® Film

## Evaporation retardant and finishing aid

Sika Film retards moisture evaporation from the concrete surface and acts as a finishing aid for concrete flatwork.

When applied to fresh concrete Sika Film is an excellent finishing aid for extra smooth and durable concrete floors. Reduces plastic shrinkage cracking caused by high evaporation due to low humidity, high temperatures or high winds. Aids in the finishing of concrete that produces little or no bleed water such as silica fume mixes or mixes with no air entrainment.

# HOW TO APPLY SIKA® FILM

**Let us help you reduce the risk of concrete cracking this summer**

1. Place concrete
2. Screed & bullfloat
- 3. Apply Sika® Film (mist coat)**
4. Stick trowel & closing edges
- 5. Apply Sika® Film (mist coat)**
6. When finishing with a power trowel, use Sika® Film to aid finishing

**Please Note:** Anytime you touch the concrete surface, re-apply Sika® Film.

**Sika® Film needs to be diluted:** 1 part Sika® Film, 8 parts water.
