

SIKA AT WORK

G CRIBS - EL GOUNA RED SEA, EGYPT

TILING SYSTEMS: SikaCeram®-205 Large

BUILDING TRUST

G CRIBS – EL GOUNA RED SEA MANSIONS

PROJECT DESCRIPTION

G Cribs is one of the latest luxurious projects located within the Mansions in El Gouna, Red Sea. It is a residential gated community that consists of an enormous 83% of lush, vibrant green areas against the 17% of infrastructure. Finished to perfection, these residences are sleek, modern and spacious.

PROJECT REQUIREMENT

The facades of residential mansions are in the modern style, covered with Egypt's finest Sinai Golden Marble Stones. The marble tiles were laid on more than 8,000 m² facade area.

Special Requirements

To use a tile adhesive of high performance and C2TE characteristics that can work in outdoor areas.

Our most current General Sales Conditions shall apply. Please consult the most current local Product Data Sheet prior to any use.

SIKA SOLUTION

SikaCerem®-205 Large: Cementitious tile adhesive consisting of high quality cements, selected silica/quartz sands and specific additives with a high polymer content. It is suitable for installing tiles on building facades and for outdoor use.

Why Sika

Strong technical support, international brand name, continuous follow-up.
