ROOFING: Sarnafil® G476-20 · Sarnafil® G410-20L

BUILDING TRUST

# BACCHUS APARTMENTS REFURBISHMENT, AUCKLAND, NZ.

## PROJECT DESCRIPTION

The planters of this apartment complex had leaked considerably since their installation, and had already received two failed waterproofing applications. The bitumen membrane used the second time resulted in plant root attack and subsequent paths for water migration down onto the basement carpark.

## PROJECT REQUIREMENT

The planters had to be emptied out and re-waterproofed with a durable and root-resistant solution.

## SIKA SOLUTION

Sarnafil G476-20 was selected to tank the planters, due to its inherent root resistance, heatwelded laps, and the ability to be loose-laid directly over the existing bitumen membrane without removing it.

## SIKA PRODUCTS

Sarnafil G476-20, Sarnafil G410-20L

## PROJECT PARTICIPANTS

Product Specifier: Prendos Ltd  
Main Contractor: Teak Construction  
Specialist Contractor: Aquastop Ltd  
Sika Organisation: Sika (NZ) Ltd
