

SIKAFLOOR®-CUREHARD-24

LEAVES COMPETITORS IN THE DUST

Sikafloor-CureHard-24 concrete surface hardener and dust-proofer has just been released to the New Zealand market and on-site testing by a major concrete company has proven that it's superior to all the rest.

Sikafloor-CureHard-24 is even better than our long-standing Purigo-5 S. This scientific breakthrough is a high solids blend of activated silicates, which chemically react with calcium hydroxide in the concrete to make the concrete up to 40% more abrasion resistant. It eliminates surface dusting, helps to reduce tyre marking and makes cleaning easy.

What's more, the deep penetrating properties of Sikafloor-CureHard-24 mean that it soaks right in and works for the life of the concrete. The older the concrete gets the better it will perform. Over time,

the floor will take on a soft silky shine, with a surface that is sealed tight and easy to clean... Forever!

Not only is Sikafloor-CureHard-24 superior to other products in the market, it's easy to use and significantly cheaper, making it the best value for money you can get when it comes to improving any warehouse or factory floor.

Sikafloor-CureHard-24 is part of the extensive range of Sikafloor products for sealing and protecting concrete.
