ROOFING

BUILDING TRUST

# PRINTLINK PETONE

## PROJECT DESCRIPTION

The roof on this building had for a number of years been leaking during heavy rain. It had got to the point where whenever it rained, the occupants would use a collection of buckets to catch the many leaks.

## PROJECT REQUIREMENT

Sika's Sarnafil S327-20L mechanical fixed system allowed the business to function as normal because it does not require the existing roof to be removed.

## CHALLENGES

The business is a 24 hour operation so they could not afford to shut down while a new roof was installed. Multiple air conditioning units and other protrusions had to be factored into the install. Wet weather was often an on-site issue. Because of the location, just one street back from Wellington's harbour, there were significant high wind-lift challenges to be met.

## SIKA SOLUTION

Sarnafil S327-20L, mechanically fixed

## PRODUCTS USED

Sarnafil S327-20L  
Sarnafil G-410-20L  
Sarnafast  
SBS washers

## PROJECT SIZE

600m<sup>2</sup>

## PROJECT PARTICIPANTS

Specialist Contractor:  
Sika Contact:

Brommel Roofing
